Federal Lands Access Program (FLAP)

Improving access to and within federal and tribal lands

Kansas

MAP-21 Funding Authorized:

FY 2013: \$812,330

FY 2014: \$818,432

FY 2015: \$802,023

Federal land acreage for the five core FLMAs: 0.98%

Federal public road miles: 357

Number of Federal public bridges: 15

Recreational visitation: 8,461,501 visitors per year

Highlighted Project: North 1200 Road Widening

Constructed: FY 2014

Success Story:

The project includes reconstructing existing 24 foot wide road with 6.5 foot paved shoulders to provide safe traveling surface for bicycles.

Clinton Lake, a U.S. Army Corps of Engineers reservoir near Lawrence, Kansas, provides flood protection, water supply, water quality, recreation, and fish and wildlife benefits to the citizens of Kansas and the region. This road provides access to all the recreational areas at Clinton Lake and to the city operated golf course, serving over 1.3 million visitors in 2012. Bicyclists were forced to ride in the travel lane on this 55 mph road due to the lack of paved shoulders, placing them at high risk for an accident and making it a safety concern for all users.

The project represents a successful collaboration between Central Federal Lands in a Stewardship and Oversight agency and Douglas County the delivering agency, where the project was able to be accelerated from FY17 and to FY14.
