Mr. David Johnson
President
Accuform Signs
16228 Flight Path Drive
Brooksville, FL 34604

Dear Mr. Johnson:

In your letter of August 25, 2009 you requested the Federal Highway Administration (FHWA) acceptance of the Accuform model FRC750 x-footprint sign stand as a crashworthy traffic control device for use in work zones on the National Highway System (NHS). You requested acceptance of the temporary sign stand for use with roll-up sign substrate materials. Accompanying your letter were the FHWA Office of Safety Design forms and a copy of the crash test report. The test summary, device drawing, and test article description pages are enclosed with the acceptance forms.

You requested that we find the FRC750 acceptable for use as a Test Level 3 device on the NHS under the provisions of the National Cooperative Highway Research Program Report 350 "Recommended Procedures for the Safety Performance Evaluation of Highway Features".

This letter acknowledges FHWA's acceptance of your request. The original completed forms have been modified by the addition of the FHWA acceptance letter number and the date of our review. The form will be posted on our Web site in the near future.

Sincerely yours,

David A. Nicol, P.E.
Director, Office of Safety Design
