What I'm after is information from the Federal Highway Administration (FHA), a branch of the Department of Transportation. What I want, in particular, is a copy of every letter the FHA sent to folks who'd made a FOIA request and then gone and appealed it in the year of our Lord 2022. What I'm after, and nothing more, is a copy of every final appeal letter the FHA sent out to these here folks, which is the last thing they get from the agency once their appeal's all said and done. I ain't asking for no halfway-done letters or no drafts or nothing else that might have been sent during the appeal process. Now I don't want to put you out none, but I do request that the information be delivered to me in electronic form, like a PDF or a Word document, if that ain't too much to ask. And if that ain't possible, well, then you can send it to me however is most convenient for you.

2023-0107-CA	3/23/2023	McIntosh, Dawn	Melvin J Burkley	On February 2, 2023 I was driving my vehicle west bound on Del Amo boulevard and encountered a poorly repaired road which destroyed my left front tire, rim and left rear tire. The road was previously repaired, but due the extreme rain in California the repair failed. I submitted a claim ([Ex. 6]) to the City of Long Beach, CA, but the claim was denied due to the fact the city claimed they were unaware of the damage road, which I found to be untrue. The road was previously repaired by the city. I stated this in my claim that the road was previously repaired but the repaired was not sufficient. I'm requesting all of the reports covering the repairs located in the area were the incident occurred covering the period 01-2021 to 03-2023, and a copy of the investigation of my claim. Located in those repair reports it will clearly show that the city was aware of the repairs done to the area in question and my claim for reimbursement should be approved. In addition, I'm aware of other people who have filed similar claims against the City of Long Beach, CA who received the same denial correspondence, and I find it completely unbelievable that the City Attorney's Office is completely unaware of the damages to their roads and may have lied about conducting an investigation and simply mailed out a "standard form" letter to those who seek reimbursement of damages to their vehicles. In addition, the Government codes 830 & 835 stated by the City Attorney office really doesn't apply to the incident in question. Why would or should a motorists forsee that the roadway that their traveling on be damaging to their vehicles, if their paying taxes in the city they reside in, don't those taxes go toward street maintenance?

Although older documents are being requested, it might be helpful to note that the FHWA provided a notice regarding the Project on 2/26/21 which can be found here: https://www.federalregister.gov/documents/2021/02/26/2021-03930/notice-of-final-federal-agency-actions-on-proposed-transportation-project-in-florida Besides the link in the first email, you can try FDOT#436292-1, which has a Project webpage here. However, the Project or Application Number might be entirely different in years past, as we believe it was considered, but denied by the FHWA many years prior to the 2021 approval, sometime in the previous date range given. Those older denials and their explanation letters are what we desire.

2023-0270-NC	9/28/2023	Holloway, Matt	-	There is a bridge in the Grandfather Ranger District (in the Pisgah National Forest I believe). It is located just north of Mortimer, North Carolina, where the Mortimer Campground is located (https://www.fs.usda.gov/recarea/nfsnc/recreation/hiking/recarea/?recid=49006&actid=24). The bridge is about 1.4 miles north of the campground, on Edgemont Road, and crosses Wilson Creek. This bridge is awesome and I am hoping to learn more about its construction. Could you send any studies or reports associated with the bridge's construction, be they engineering or environmental. Also, could you provide maps, plan sheets, or other drawings generated as part of its construction. Finally, information that could tell me how much it cost in material and man hours would be nice, if possible. Thank you so much, Matt
