2014-0295	Hunter		05/08/2014	I represent the Utah Department of Transportation and the State of Utah. There is litigation pending between the Ute Tribe and the State authorities over who has arrest powers on which roads in the Uinta Basin. This has led to the question who claims which roads. The Tribe has been unable to provide a map or listing of what it claims to be Tribal Roads. They say that Red Plains, an engineering firm in Vancouver, Washington, has prepared such a map. I see from your web site that you pay them for 797.4 miles of Tribal roads under the IRR program. Can you give us either a map or a list so that we can compare it with the map from the counties. UDOT also pays fuel taxes to the counties to maintain their roads. We are trying to figure out if there is over lapping claims and whose roads are which.

2014-0457	Mann		10/14/2014	<p>files and formats are requested for the Tiller Trail Highway Project, OR PFH 16(7), as follows:</p> <ol style="list-style-type: none"> 1. Geopak XS-List Report (cross-section files in XSR format) of the original ground surface. This information is stored in Geopak in ASCII format and can be exported as an ASCII text file. Although the text file may not exist at the time of this request, the data is stored in Geopak based on information I received directly from Bentley Systems. 2. The horizontal and vertical alignments for the final road design. The horizontal alignment defines the centerline of the road and the vertical alignment defines the finish grade of the road at centerline. I am requesting this data be converted to LandXML format (xml file extension). 3. The original ground three dimensional surface data that is used to generate the final design, generate earthwork quantities and define existing site features such as drainages, existing utilities and so on. This data may reside in the design system as a digital terrain model (dtm), or as a Triangulated Irregular Network (tin) file and contains the topographical survey data of the original ground surface and may also contain break lines and boundaries as defined by the survey team or design team. I am requesting this data be converted to LandXML format (xml file extension). 4. The final design three dimensional surface data. This data may reside in the design system as a digital terrain model (dtm), as a Triangulated Irregular Network (tin) file, or as cross section data. It is the final design surface merged with the original ground surface. I am requesting this data be converted to LandXML format (xml file extension).

2015-0067	Guy	Highway Tech 2	11/19/2014	<p>am requesting some information regarding CDL law. I work for the Ohio Department of Transportation and I am also safety advocate. We are seeking clarification regarding as to whether City, County and State agencies are exempt from the current hours of operations for driving and hours of service. While typically we operate with 12 hours shifts some locations and depending on a snow event operate with a 16 hour shit. Most of that time is spent drive a snow plow truck. It is my understanding that the current law is 11 hours of driving time and 14 hours on duty. Are we exempt from that law as a state agency. There is debate on this issue but as it stand no one has been able to find any law or reference to state that there are exemptions.</p> <p>Are there any reference(s) that someone can guide or direct us to in relation to this inquiry Any in formation would be greatly appreciated.</p>
