

Transportation Safety Planning and the
Zero Deaths Vision:

A Guide for Metropolitan Planning Organizations and Local Communities

The Federal Highway Administration has published a new resource, *Transportation Safety Planning and the Zero Deaths Vision: A Guide for Metropolitan Planning Organizations and Local Communities*, which provides references to key information for metropolitan planning organizations (MPOs) and local communities to understand and use the safety planning process to work toward the zero deaths vision.

This new guide is a useful resource for MPOs, local communities, and affiliated transportation agencies and stakeholders new to the transportation safety planning process. Stakeholders within the following sectors can benefit from this guide:

- Engineering
- Emergency services
- Law enforcement
- Judiciary
- Economic development
- Planning
- Community outreach
- Public health
- Education
- Legislation/Policy
- Private sector/consulting
- Research

This easy-to-use reference helps to support the development, implementation, and evaluation of performance-based strategic safety plans for MPOs and local communities. It provides noteworthy practices and examples from other strategic safety planning efforts, including links to detailed references and resources. MPOs and communities can tailor the information in the Guide for their specific needs and context.

For more information on the Guide and how to access it, please visit: <https://safety.fhwa.dot.gov/tsp/>
