Construction Activities & Upcoming Work

This past week Inland Crane, Inc. (ICI) continued working on the Abutment 1 Anchor Block reinforcing steel and formwork.

Due to health and safety reasons ICI pulled all workers off the project due to the fires burning in the area and unhealthy air quality. ICI will return once the air quality levels have decreased to lower levels. Once ICI returns to the project work will continue on the EAB 2A anchor base plate placement and the completion of the proof testing of the ground anchors. Work will resume on reinforcement steel at Abutment 1 anchor blocks.

The Salmon River Roadway will continue to be a single lane thru the project site at the crane tower. The speed limit continues to be 15 mph thru this area during the 2024 Construction Season.

Please Use Caution when traveling and be aware of oncoming traffic, during day, night, weekdays and weekends. Thank you for your cooperation and understanding.
