Construction Activities & Upcoming Work

Inland Crane, Inc. (ICI) continued placing reinforcing steel and formwork at Abutment 1 and will continue this work through the end of this week.

In the coming week, ICI will de-mobilize and securing all materials at the Stoddard trial head, Ebenezer camp ground staging areas and the project site for the winter. This is due to the current and forecast weather conditions. It is anticipated that ICI will return sometime around April 1, 2025. This will be the last project newsletter until that time.

During the winter, the Salmon River Roadway will continue to be a single lane thru the project site and at the crane tower. The speed limit will continue to be 15 mph thru the work area during the 2024/2025 winter shutdown.

US Forest Service has extended the area closures for the Stoddard Bridge construction project into 2025. **Please Use Caution** when traveling and be aware of oncoming traffic, during day, night, weekdays and weekends. Thank you for your cooperation and understanding.
