Construction Activities & Upcoming Work

Inland Crane, Inc. (ICI) has completed the placement of the Abutment 1 Concrete, and is currently working on erecting the tower for the bridge. This work will continue until the tower, and an additional temporary tower is erected on top of the tower to facilitate the hanging of the suspension cables, and saddles are installed.

ICI will continue with placing and tying reinforcing steel, and setting forms for the last small pour at Abutment 2. This concrete pour is currently planned for next week.

With the tower erection there could be short traffic delays of up to 20 minutes, to pick the tower pieces from the transport and set into place.

Please Use Caution when traveling and be aware of oncoming traffic, during day, night, weekdays, and weekends. It continues to be a single traffic lane through the construction site at the Crane Tower. Concrete barriers has been installed to protect the traveling public and the project site. The speed limit continues to be 15 mph thru this area during
