Eastern Federal Lands Access Program Call for Projects Alert- Rhode Island

Greetings:

The Eastern Federal Lands Highway Division (EFLHD) of the Federal Highway Administration (FHWA) will be accepting Federal Lands Access Program (FLAP) applications in order to develop a multi-year program of projects for Federal Fiscal Years (FY) 2027 through FY 2029. All final project approvals will be contingent upon the availability of funds in the year for which they are being requested.

The Call for Projects application period opens October 1, 2025, and runs through January 15, 2026. Please explore our FLAP website located at <https://highways.dot.gov/federal-lands/flap> and follow the links to the state webpage to download the application, review the applicant webinar, FAQ's and tips for preparing a good application. Applications should be submitted via email to EFL.planning@dot.gov by the end of the day (11:59 PM) on January 15, 2026, to be considered. If required, applications via mail, Fedex, UPS etc. or fax will also be accepted.

An *estimated* total of \$250K will be available for programming in your State.

What is the purpose of the Federal Lands Access Program?

The purpose of the FLAP is to provide safe and adequate transportation access to and through Federal Lands for visitors, recreationists, and resource users. The FLAP supplements State and local resources for public roads, transit systems, and other transportation facilities, with an emphasis on high-use recreation sites and economic generators.

Where can projects be located?

Proposed projects or studies must be associated with a public highway, road, bridge, trail or transit system that is located on, is adjacent to, or provides access to Federal lands for which the transportation facility's title or maintenance responsibility is vested with a State, county, city, township, tribal, municipal, or other local government entity.

What types of applications will be considered?

Applications will be accepted for the following:

Capital Improvements- These proposals include rehabilitation, restoration, construction, and reconstruction of

roads, bridges, multiuse trails, and other long-term transportation system asset improvements. This includes improvements such as safety improvements, widening, realignments, surfacing, culverts, signing, guardrail, walls and associated roadway appurtenances.

Enhancements- These proposals are road and trail related improvements such as interpretative signing, kiosks, viewpoints, adjacent vehicular parking areas, roadside rest areas (including sanitary and water facilities), provisions for pedestrians and bicycles, acquisition of scenic easement and scenic or historic sites, trailheads, trails, and improvements that improve public safety and reduce vehicle-wildlife mortality while maintaining habitat connectivity.

Surface Preservation- These proposals include surface preservation of roads, trails, and adjacent vehicular parking areas. They include chip sealing, crack sealing, and aggregate courses. FLAP funds are not intended for routine maintenance projects (e.g., potholes, mowing, snow removal, same type guardrail replacement, etc.).

Transit- These proposals include construction of transit facilities (e.g. ferry docks, helipads, boat ramps) and limited duration operation/maintenance of transit services and facilities (including vehicles) and the purchase of transit vehicles.

Planning- These proposals include engineering feasibility studies, corridor management planning, bicycle/pedestrian planning and alternative transportation system planning that will provide valuable information for future FLAP proposals.

Research- These proposals include evaluating solutions that enhance access, safety or sustainability. They address issues such as wildlife-vehicle collision avoidance measures, context sensitive roadside safety features, and congestion management strategies.

Who may apply?

Eligible applicants include State, county, tribal or city government agencies that own or have maintenance responsibility of the transportation facility or must supply a letter from the facility owner/maintainer indicating the application is being submitted on their behalf. Project applications must be sponsored and/or supported by the appropriate Federal Land Management Agency (FLMA) unit whose access would be enhanced by the proposed action. This acknowledgement of sponsorship and support must be demonstrated by an application signature and/or letter of support attached to the application from an appropriate representative of the benefitting FLMA unit. Early coordination between the appropriate FLMA and state/county/local/tribal government is encouraged to ensure adequate time for thorough review and input before the submittal due date. All projects must be submitted using the EFLHD Access Program Application form (located on the website).

Are matching funds required?

As a result of legislative action, the program no longer requires any matching funds. Project award values represent 100% federal funding. Applicants may also provide additional funds beyond the requested amount of FLAP funds to contribute to the project. Because of the limited amount of FLAP funding available in each state in any given federal fiscal year, proposals will receive additional consideration when funding is leveraged from other sources.

How would the projects be delivered?

On the application form you will select from EFLHD, State DOT, Local Public Agency or “Other” as the preferred delivery organization.

State DOTs are eligible to deliver their own projects. Local agencies requesting to deliver their own project must be certified by the State DOT or demonstrate prior experience with the use of federal transportation funds (Title 23) to deliver projects in compliance with Federal Highway Administration regulations. Additional information regarding local agency project delivery roles and responsibilities may be found at the following website:

<http://www.fhwa.dot.gov/federal-aidessentials/stateresources.cfm>

Eastern Federal Lands Highway Division (EFLHD) is assessing impacts to our staffing resources and current project delivery schedules, which are pushing out of the current FLAP planning window. Unfortunately, this is preventing EFLHD from accepting the delivery responsibilities for potential new FLAP projects. We recommend that you reach out to your

local, county, MPO or state governments/state departments of transportation for delivery or cost estimating assistance. Architectural/Engineering firms can deliver projects on behalf of the applicant as long as consultant selections are made in a manner that provides full and open competition, and in adherence to applicable federal requirements.

What if I have questions?

You are welcome to contact any of the FLAP Programming Decisions Committee (PDC) members for your state with your questions using the contact information contained on the website. Additionally, questions about project eligibility or the EFLHD application process can be directed to Lewis Grimm or Richelle Ellis, FHWA/EFLHD (contact information shown below). Also please find on the website an applicant presentation, FAQ document and Tip Sheet with suggested factors to be considered for submitting a good application.

Thank you for your interest in the FLAP program. We look forward to working with you in developing a multiyear program of projects for the period of FY2027 - FY2029.
