

ProjectTracker SaaS

Trusted by planning agencies across the country for over 20 years, ProjectTracker is a leading SaaS solution for Capital Program Management improving outcomes and providing **measurable time savings** for organizations like yours.

Software subscriptions (SaaS) offer a **lower upfront cost** while **eliminating the need for ongoing on-site IT support**. Ongoing development by EcoInteractive ensures the platform stays aligned with the latest legislation and security standards while new features are added, maximizing the value of your investment while eliminating the risks associated with custom-built solutions.

From planning to programming, ProjectTracker has you covered!

From soliciting and prioritizing funding requests through creating fiscally constrained multi-year funding plans and putting projects out to bid, ProjectTracker supports all aspects of the planning process. ProjectTracker has a robust API allowing for integration with other systems, data sources, and processes, ensuring it really is your single source of truth for project information.

Get your day back with ProjectTracker

50% less duplicate data entry
Users spend half as much time on duplicate data entry, data reconciliation and error resolution.

65% less time creating reports
Significant time savings running required reports (such as the TIP or LRTP) as well as ad-hoc reports.

30% less time on financial constraints
Less than a third as much time spent ensuring financial constraints are met.

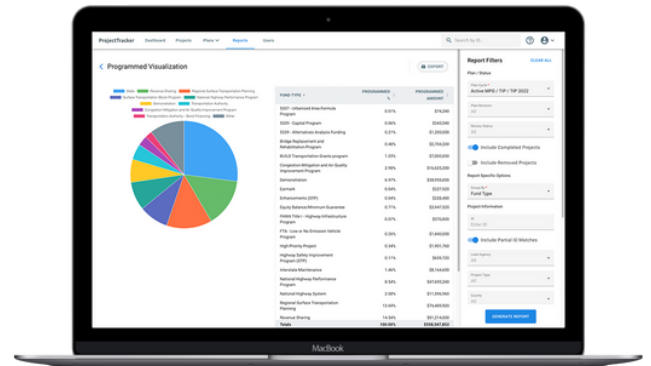

90% less time on public inquiries
Spend 1/10th the time you used to responding to public inquiries.

Features

- CIP, TIP, STIP, LRTP Management
- Multi-agency submissions & approvals
- Project solicitation and prioritization
- Project delivery Tracking
- Customizable reporting
- GIS mapping
- Interactive public website & commenting
- Performance measure tracking
- ADA-compliant user interface
- Conforms with SOC 2 standards

“ ”

“Everybody is looking at the same data. We can all sort of talk and look and make changes at the same time; the ease with which you can filter and query and do all that sort of stuff is amazing. That is the next level compared to even what the last platform was... every day I’m blown away.”

- Andrew Austin, Transportation Planner, The National Capital Region Transportation Planning Board

About EcoInteractive

EcoInteractive is the developer of ProjectTracker SaaS, the leading cloud solution tailored to the needs of transportation planners. Its eSTIP and eTIP platforms are used by DOTs, MPOs, and local capital program planners in 29 states (and counting!)

ProjectTracker SaaS empowers agencies to streamline transportation planning, boost collaboration and efficiency, connect stakeholders through integrated workflows, make data-driven decisions, and deliver more transparent, effective planning outcomes.

SaaS Makes Sense

- Lower total cost of ownership over short AND long time horizons
- Continual product innovations aligned with planner needs & legislative changes
- Domain expertise working with a large community
- Less time to recognize return on investment
- Eliminates the need for on-site IT support

EcoInteractive
by SOVRA

Modern, efficient capital planning software for state, regional & local governments.
