Project Partner:

USFS - Gifford Pinchot  
National Forest

Contractor:

LKE, Corporation  
Washougal, WA

Fixed Completion Date:

October 20, 2020

Project Description

This project is located in Gifford Pinchot National Forest, Skamania County, Washington. The scope of work for this project is to repair roadway sites that were damaged during a large storm event in 2016. The project is using Emergency Relief for Federally Owned Roads funding to repair the sites.

The following eight (8) Forest Service (USFS) sites are included in this project:

- RD 2900 MP 7.6      RD 2324 MP 0.6
- RD 2900 MP 9.3      RD 2325 MP 3.5
- RD 2900 MP 10.2    RD 2500 MP 25
- RD 2900 MP 10.4    RD 9000 MP 45

The crew is working at RD 2900 MP 7.6, Camp Creek is still diverted but flowing through the placed 84” pipe culvert. LKE has fully installed the 170 foot long 84” pipe culvert and concrete pre-cast cut-off head and end walls. Back fill has begun to be placed and compacted. The site is close to becoming passible by construction equipment. Once passable with construction equipment, LKE will divert water at Scamp Creek, RD 2900 MP 9.2, and begin preparation for installing two 72” pipe culverts with precast concrete cut-off head walls and a conjoined concrete cut-off end wall.

Traffic Delays

National Forest Development Road 2900 closed at MP 4. Anticipated reopening date: **October 20, 2020.**

CAUTION!!! There is an active haul route along the open portion of RD 2900.
