Construction Activities

Work at Forest Service Road (FSR) 5008-100 MP 0.75 will continue next week. The crew at this site has made good progress on the installation of the 144-inch culvert. The installation of the first two sections is expected to be completed by the end of Friday. Once the work on those two sections is completed, the roadway will be shifted over the new sections of culvert. The excavation for the last section of culvert will then begin. The last section should be installed early next week. Closures at this site will continue to follow the schedule shown to the right.

Work at FSR 5140 MP 8.75 will focus on the ditch repair next week. Also next week at FSR 5140 MP 10.2, work will continue on the installation of the 144-inch culvert. It is anticipated that the 144-inch culvert will be installed by the end of the week. FSR 5140 will remain closed to public traffic until the work at MP 8.75 and MP 10.2 is completed.

The work at FSR 4150 MP 0.3 and MP 2.2 is now expected to resume in early August. During this work closures will follow the schedule shown to the right.

Please, if the closed signs are up, stay out of the work area. Also, use caution on roads nearby these sites, as there will be increased traffic related to work activities.

Road Impacts

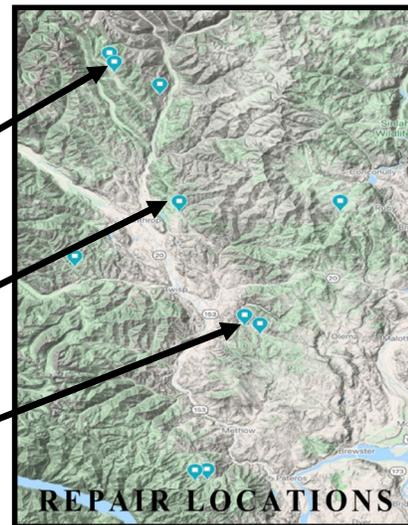

- **Closed** - FSR 5140 MP 8.75 & MP 10.2
- Work underway
- **See schedule above** - FSR 5008-100 MP 0.75
- Up to 3 hour waits - Work underway
- **See schedule above** - FSR 4150 MP 0.3 & MP 2.2
- Up to 3 hour waits - Resuming early August
