

# *Repave Denali Park Road MP 0 to 3.4*

## *Construction Project News Letter*

**August 23, 2019**

The contractor continued the full depth reclamation (FDR), this week, along with installing the 24" culvert under the railroad depot approach road. Their plans are to continue the FDR west up the park road, and possibly install their asphalt paving control strip between the bus depot and the entrance road to the mercantile.

Please use caution and slow down while traveling through the work zone. Expect short delays and watch out for equipment and workers.

Getting the train hooked up to foam.
