The Hawaii Department of Transportation (HDOT) has partnered with the Central Federal Lands Highway Division of the Federal Highway Administration (FHWA) to evaluate the replacement of three temporary "ACROW Panel" Wainiha Bridges along Kuhio Highway (Route 560). Your continued input is extremely valuable as we move forward in the environmental process. Your input helps us to understand any potential issues or considerations of the proposed action so that we can fully evaluate the potential environmental impacts, as well as identify opportunities to help avoid, minimize, and/or mitigate these impacts.

What type of input does the project team need? *(Please use additional sheets as necessary.)*

- *What issues or considerations do you feel are important to be addressed in the Environmental Assessment for the project?*
- *Are you aware of any specific resources that may be affected by the project? Please describe.*
- *Are you aware of groups, individuals, or organizations that should be made aware of the project?*
- *What concerns or questions do you have about the project?*
