RE: Tribal Transportation Program Coordinating Committee (TTPCC) FY 2019 Annual Report and Recommendations

Dear Assistant Secretary Sweeney, Administrator Nason, and Associate Administrator Hess:

On behalf of our respective Indian Tribes, Nations, Communities and Villages, the Tribal representatives to the Tribal Transportation Program Coordinating Committee (TTPCC) would like to express our appreciation to the Administration for continuing the annual meeting between the Committee’s Tribal representatives and senior Administration officials of the Bureau of Indian Affairs (BIA) and Federal Highway Administration (FHWA) regarding the transportation accomplishments and challenges faced by the Nation’s Tribes. The Committee provides input and recommendations to FHWA and BIA concerning Tribal transportation infrastructure needs. As is our custom, we provide a report to you regarding on-going transportation and highway safety issues important to our respective Tribal governments in the twelve BIA Regions.

We appreciate the on-going support of your departments as the TTPCC continues its work to advise the BIA and the FHWA on how to successfully administer the Tribal Transportation Program and improve the Program and practices to meet the needs of Indian Country.
For the third consecutive year, we begin our report with a discussion of the Tribal Technical Assistance Program (TTAP). The TTAP issue, more than any other, has occupied the Committee’s time and efforts, and has consistently been the most urgent priority brought forward in each region by Tribal transportation leaders.

The function of the TTAP is to assist Tribal governments with building their technical capabilities by providing knowledge and greater access to transportation technology, training, and research opportunities. Before 2017, the Program was administered through seven regional TTAP centers that had been providing these services to Tribes. In 2017, the Office of Innovative Program Delivery (OIPD) made the decision to restructure the TTAP Program without tribal consultation or input. Embarking on a two-year “pilot program,” OIPD sought a new contractor to run a centralized program from one physical location, and, again without any tribal input, awarded the TTAP contract to the University of Virginia’s Center for Transportation Studies. Tribes and tribal transportation officials sounded the alarms at the time of that award’s announcement, expressing that the centralized TTAP structure was far-removed from Indian Country, that it was placed in a center with no apparent experience with the TTP or tribal programs, and that it was staffed by trainers without tribal transportation backgrounds. Tribal officials reiterated that this pilot would not be responsive to tribal needs.

The concerns from Indian Country and similar concerns voiced at each of the TTPCC’s meetings directly to OIPD officials went unheeded. The TTAP program forged ahead, as the Department marginalized and diminished the Committee’s input and recommendations to improve the TTAP Pilot Project. Prior to the TTAP Pilot Project, the former TTAP centers worked with Tribes in partnership to enhance their training programs (recognizing that Tribal Nations are the ultimate beneficiaries of the TTAP services). They assisted Tribes by educating State departments of transportation and regional planning organizations by asserting that Tribes are transportation stakeholders. They also helped State DOTs better coordinate and consult with Tribes to ensure that Tribal transportation projects were listed in Statewide Transportation Improvement Programs (STIP). OIPD does not operate with such a mindset, which is a detriment to Tribal Nations.

Last year, we raised the following concerns, which we quote below:
During our September 2019 TTPCC meeting, OIPD CIO Furst made a lengthy presentation about the feedback the office had received from Tribes and tribal stakeholders, and committed to engage with the TTPCC and Tribes regarding the future of the TTAP. The TTPCC recommended to Mr. Furst that he proceed with tribal consultations, and there was discussion about the content of those consultations. The TTPCC then formed a steering committee (consisting of regional Tribal representatives) to work with OIPD to integrate feedback and work towards developing the model. We recommended that regional meetings be held throughout the nation to further inform and develop the model. The TTPCC also recommended that OIPD use a facilitator or a mediator to lead the discussions and meetings on restructuring.

Mr. Furst was receptive, though there were no concrete decisions made at the meeting. He proposed that the OIPD consultations be used to identify the objectives of the TTAP program, and then use those objectives to determine the best structure and methodology for creating the next model of TTAPs. Mr. Furst also wished to focus on the financial feasibility of the models and the “scalability” of the model if funding for the program expanded or contracted. The TTPCC supported this idea and strategy moving forward.

In summarizing its points and concerns, the TTPCC echoed the overwhelming response of the Tribes in telling OIPD that the most important aspect of the TTAPs is that they build relationships with the Tribes, and that they become familiar with the Tribes, their projects and capacities. Service providers at the old TTAP centers had built these relationships and become familiar with Tribal needs and priorities. Tribes were concerned that these long-term aspects of a successful TTAP would be sacrificed to realize short-term goals or efficiencies.

Over the course of the next year, the OIPD and DOT will work on the restructuring of the TTAP with the Tribes. According to OIPD, this will necessitate a suspension of the program and its direct technical assistance services. OIPD says it will make available its webinars, and has worked with the National Highway Institute so that group trainings will be made available to Tribes free of charge. Mr. Furst will draft a “Dear Tribal Leader” Letter outlining these issues, and has said he will submit a draft to the TTPCC prior to distribution. We can confidently say we
The Committee continues its work to move the Tribal Transportation Program inventory systems into the 21st Century by transitioning away from the current "Oracle" database and the RIFDS system to a system based on Geographic Information System (GIS). Last year, the Committee completed the GIS Pilot Project (in collaboration with the National Tribal Geographic Information Support Center - aka Tribal GIS) and developed an attribute table for the inventory compatible with the NTTFI using GIS technology. This replaces the older and outdated Oracle database. The Committee has made multiple recommendations to the BIA to move forward with the GIS project, and the BIA has done so. According to Sheldon Kipp, Supervisory Highway Engineer, the BIA is pursuing migration of the database and gearing up for the paperwork and processes to sunset RIFDS and transition to GIS. The BIA will work with the TTPCC and the QA/QC to accomplish this. The Committee sent a letter to Daryl LaCounte, Director, BIA, on August 1, 2019 reiterating the Committee’s commitment to transition the inventory system to a GIS-based system as soon as possible.

Mr. Kipp has identified a group of six BIA employees from different regions who have GIS expertise who can help with this transition. The Committee will recommend tribal representatives, as well, to work with the BIA on this transition. Modernizing the NTTFI database will allow Tribes to better manage, improve, reconstruct and maintain their road inventory, as the GIS system is directly compatible with the systems used for engineering and tribal data. This will also lessen the burden on tribes in updating their inventory.

4. BIA/FHWA Organizational Documents

The organizational documents that contain the agreement between the BIA and FHWA concerning their joint administration of the Tribal Transportation Program are the National Business Strategy, FHWA Operations Manual, Memorandum of Understanding (MOU) and Communications Plan. These documents have been updated to conform to the most current surface transportation measures. The Committee has assisted the agencies by providing input into the FHWA’s revised Communications Plan and MOU. FHWA’s Office of Tribal Transportation helped expedite review of these items, and have completed updates to them this year. While these organizational documents primarily concern how the agencies interact with each other, or their
into the draft for a final rule. In particular, we echo the recommendations of the Tribal Caucus of the negotiated rulemaking Committee to create an Office of Self-Governance within the Department of Transportation to handle the administrative requirements of self-governance and to help integrate the concept of self-governance across the Department’s modal administrations. We also endorse the idea that the Department create a Tribal-Secretarial Advisory Committee like the Departments of Interior and HHS have done.

The extension of the Tribal Transportation Self-Governance Program to the Department and its modal administrations holds great promise to further streamline the delivery of Federal transportation programs which Tribes may include in compacts and funding agreements. Using a single award instrument that reduces unnecessary regulations and channels multiple DOT modal administration awards (e.g., Tribal Transportation Program “Tribal shares,” TTP safety and bridge grants, FTA Tribal Transit Program formula funds, FAA Airport Improvement Program funds, NHTSA safety grants, etc.) into one agreement will reduce Tribal administrative costs. This will permit Tribes to direct more resources and energy into building Tribal transportation capacity to successfully carry out transportation construction projects, transit programs, and the safety improvement projects our Tribal communities need. This Committee congratulates the Negotiated Rulemaking Committee on its fast work over this past year.

7. Looking Ahead

The TTPCC will continue working on many of the above items in the coming year. In addition, we expect to tackle some new ones, including:

- Helping the BIA and FHWA come up with reliable and useful methods for reporting road maintenance spending throughout Indian Country with TTP and appropriated maintenance funds. We think more granular data will assist Tribes and the Departments to better understand maintenance needs and what types of roads those funds are being used for.

- We will continue to work on better defining the updated TTP coding guide to ensure that there is a common understanding of how facilities are classified nationwide. For

RE: Tribal Transportation Program Coordinating Committee (TTPCC) FY 2020 Requested Meeting Approval

Dear Assistant Secretary Tara Sweeney and Associate Administrator Timothy Hess:

On behalf of our respective Indian Tribes, the Tribal Transportation Program Coordinating Committee (TTPCC) provides recommendations to the Federal Highway Administration (FHWA) and Bureau of Indian Affairs (BIA) concerning Tribal transportation infrastructure needs.

We met successfully in FY 2019, and held four meetings throughout Indian Country. We will review the TTPCC’s work from the last year in our annual report, which we have sent separately and will review in our meeting in November 2019. We appreciate the support of your Departments, their leaders, and staff in helping make our meetings productive this year.

In order to carry out our work in the coming year, the TTPCC respectfully requests your consideration and approval of our FY 2020 proposed meeting schedule:

- Meeting 1: November 4-7, 2019: Sterling, VA
- Meeting 2: February 3-7, 2020: Albuquerque, NM
- Meeting 3: June 1-5, 2020: Baraboo, WI
- Meeting 4: August 10-14, 2020: Lewiston, ID

The TTPCC will plan on providing an annual report on its FY 2020 work during the FY 2021 fiscal year (October or November, 2020) in a meeting in Washington, DC. We sincerely appreciate your consideration and advanced approval of these meetings dates and proposed locations. We look forward to continued work with our federal partners in the upcoming year.

Sincerely,

[Signature]

Jacque Hostler-Carmesin, Vice-Chair
Tribal Transportation Program Coordinating Committee
A. **The Mid-Year Conference** that was scheduled for June 23-25, 2020 located at the Indian Pueblo Cultural Center in Albuquerque, NM has been cancelled. We are tentatively planning for an **early Annual ITA Meeting** the week of October 13-15, 2020 located in Crystal City, Virginia.

B. **Testimony to Transportation and Infrastructure Committee on February 6, 2020.** Joe Garcia and Mary Beth Clark provided testimony to the T&I Committee regarding Tribal Transportation concerns and needs. The assistance of Matt and Tyler made the testimony go smooth. Garcia discussed the big picture in Indian Country while Clark provided more detailed information. A follow-up was requested with questions the Committee had; they were submitted by deadline Committee provided. The Testimony of Clark will be posted on ITA website.

C. **NCAI/ITA Task Force** (Chairs Joe Garcia and Mary Beth Clark) met on February 10, 2020 in DC. During this meeting updates and discussion was regarding Self Governance Rulemaking, Reauthorization, Formula, and ITA Update. NCAI/ITA Task Force and NCAI Transportation Committee will be sending out tentative agendas prior to meetings. If you have an item to be included on this agenda, please contact Tyler Scribner at tscriber@NCAI.org

D. **ITA Mid-Year 2021.** ITA plans to hold the 2021 Mid-Year meeting at the Indian Pueblo Cultural Center in Albuquerque, NM; dates TBD.

E. **ITA side-bar-meetings during NTICC.** NTICC has offered space to hold ITA meeting during the evening of the NTICC event. ITA has accepted the offer so we will be planning to have short 1.5-2-hour meeting to discuss items such as Transportation Bill Updates, revising By-Laws, etc. ITA will get additional information out at a later date.

F. **ITA formed Committees.** ITA has revised and approved two Committees to assist in keeping up with Tribal Transportation issues and/or concerns. The two committees are: Governance Committee Chaired by Gerry Hope and Operations Committee Chaired by Kim Stube.

G. **ITA has been aggressively reorganizing and getting back on track.** One of the priorities is to increase membership and having membership active as before. To achieve a successful ITA organization for our Tribes regarding transportation, we need to provide our concerns and voices that will form a compromise that can be taken forward together.

H. **Monthly Conference Calls.** ITA Executive Board and Regional Representatives have been holding Monthly Conference calls. The next one is scheduled for Thursday, April 9, 2020 beginning at 11:30 a.m. PST. If interested in joining, please email Barak Myers at Barak baraknmyers@gmail.com
