(360)619-7650

Project Description

This project is being administered by the Federal Highway Administration Western Federal Lands Highway Division, in partnership with the Blackfeet Nation and Glacier National Park. The project will rehabilitate approximately 12 miles of Many Glacier Road from Many Glacier Hotel Parking Area inside Glacier National Park to the intersection in Babb, MT on the Blackfeet Indian Reservation. In general, the project will closely follow the existing horizontal and vertical alignments of Many Glacier Road and reconstruction will provide a consistent 22 foot-wide paved surface. This project includes improved base material beneath the roadway, installing new asphalt concrete pavement surfacing, and replacing failed, undersized, or otherwise deficient culverts. The project also contains masonry and minor bridge work within Glacier National Park and turnout and parking area reconstructions throughout the project limits.

Surface conditions

The current road conditions consist of rough pavement. There are sections of the roadway that are rutted or contain collections of pot holes. There are sections of the roadway where pavement is missing all together. When traveling in this area expect rough roads and slow travel conditions.

Current and Upcoming Work

Construction has just begun on this project. Snow removal, surveying, and utility locates are on-going and will continue. The Contractor has begun staging equipment and materials on site to facilitate construction. Other upcoming work may include asphalt removal and culvert installations. Material production may begin as final approval of sources is achieved.

Traffic Delays

Due to current events unrelated to this construction project, Glacier National Park and the Blackfeet Indian Reservation are closed to the public and non-essential travel. Construction continues and will provide access for Glacier National Park administrative travel and residential travel with minimal delays.

***The Storm Water Pollution Prevention Plan (SWPPP) for this project is available for viewing at the Project Office of the Contractor in Babb, MT. See SWPPP information posted at the start of the project.**
