Construction Activities

Work at Forest Service Road (FSR) 5140 MP 8.75 and MP 10.2 is nearly complete. Pavement patching was finished this week and seeding is planned for this fall. FSR 5140 is anticipated to be open to public traffic by end of the day Friday, August 28th. Next week on FSR 5140 public traffic should expect to encounter crews working on minor clean up and finish items above MP 7.0 during the first part of the week.

Above: FSR 5140 at MP 10.2

Work at FSR 4150 MP 0.3 and MP 2.2 will continue next week. At MP 0.3 the crew will be working on completing the roadway grade over the two pipe culverts that were installed this week. At MP 2.2 the crew will be working on the installation of rip rap bank protection mitigation measures. During this work, closures will follow the schedule shown below and to the right.

Work at FSR 4010-050 MP 0.78 and MP 2.3 will be underway next week. The crew will be primarily working at the MP 2.3 site for the next few weeks on the installation of a 96-inch pipe culvert. During this work FSR 4010-050 will be closed to public traffic.

Work at FSR 4200/FSR 4200-400 MP 0.2 is currently planned to start in mid-September once work at FSR 4010-050 is completed.

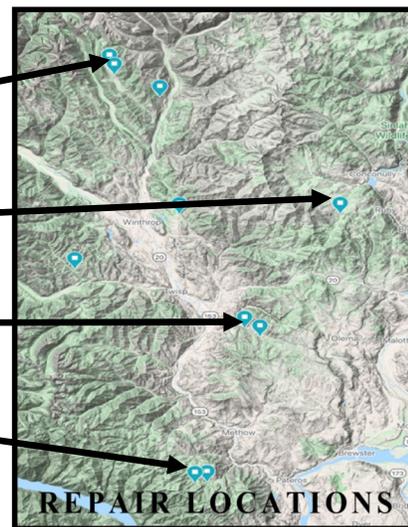

Some minor finish work will take place early next week at FSR 4415-040 MP 0.0 to MP 0.4. Limited to no delays are anticipated for public traffic using the road.

Please, if the closed signs are up, stay out of the work area. Also, use caution on roads nearby these sites, as there will be increased traffic related to work activities.
